

# **Computer Architecture Lab**

## **Report - 4**

**190010027 , 190010004**

**Newton AG Mukhopadhyay , Ameen Neroth**

Program	Number of cycles taken by each benchmark program	Number of stalling	Number of wrong path
Palindrome	14	6	4
Even odd	19	10	4
fibonacci	26	10	4
prime	27	11	6

Though not an observation , but we think that the number of the cycles taken by each program must have decreased due to pipelining.
